

As of today, Aug. 5, 2013, the following trainings have been made available:

- Agent/Broker-Individual & Shop Marketplace
- Agent/Broker-Individual Marketplace
- Agent/Broker-SHOP Marketplace

Agents may begin their training immediately and obtain an active FFM User ID by completing an identity proofing process later in August. To register for training, please access:

<https://marketplace.medicarelearningnetworklms.com/Default.aspx>

To register an account, follow these instructions:

- Click Create Account
- Complete the registration form
 - Under organization, search “marketplace” and select that option.

Once the system accepts and verifies your NPN, you will go to the Training Home Page.

On the right-hand side of the screen you will find **Browse Categories** with the available training modules listed.

***The second part of the training (User ID Identity Proofing) will be available later this month. This training will give you your access code for the Federal Data Hub and how to use the on-line features of the enrollment process.**

****The OIC is attempting to secure CEs for the training. We ask for your patience. We must submit all training modules to the accrediting agency and will do that as soon as all materials are made available.**
